Superhero Science

dr. Tijana Prodanović
Univerza v Novem Sadu, Srbija

Četrtek, 26. 5. ob 12:00 na Gimnaziji Murska Sobota

Superman can fly, Spiderman can climb walls, Hulk is stronger than any man when he goes green, but what does science say about their superpowers? Could superheroes with super-human abilities possibly exist in nature according to science? Could there really be an X-man out there somewhere, or is Batman the best we can hope for?

Predavanje bo v angleškem jeziku.
